

Dharwin Business Solutions

Website Content Brief — Designer Handoff

This document is the source of truth for the Dharwin Business Solutions website rewrite. It contains the brand voice, the locked design system, the component vocabulary, and the final corporate-voice copy for each of the 12 site pages — Home, About, the seven service pages, Product, Careers, and Contact.

Use this brief to compose the Figma mockups. Each page entry contains the section order, the locked headlines and copy, layout direction, and asset dependencies — everything required to build high-fidelity comps without reverse-engineering structure from the live site.

Engagement	Dharwin Business Solutions — website rewrite
Live site	dharwinbusinesssolutions.com
Current platform	GoDaddy Website Builder
Scope	12 pages · 7 service lines + Product, Careers, Contact
Voice direction	Traditional services-firm corporate
Reference set	Cognizant · Mphasis · TCS · Infosys
Status	Copy locked. Design system locked. Awaiting design.
Owner	The Odin (Ronak)

Prepared by The Odin · Internal handoff document · Do not distribute externally.

READ THIS FIRST

How to Use This Brief

This brief is sectioned for direct reference during Figma composition. Read Part 1 (Brand Voice and Design System) once, top-to-bottom. Use Part 2 (Page-by-Page) as a per-screen reference while you compose each page.

Part 1	Brand voice, design system, components, site-wide patterns. Build the Figma component library against this
Part 2	Per-page content — one entry per website page. Section order, locked headlines and copy, layout direction,
Part 3	Asset checklist and consolidated client information requests. Use for the Dharwin review pass and asset coll

CONTENTS

Part 1 — Foundation

- Brand voice — voice attributes, do/don't rules
- Design system — colors, typography, spacing
- Motion system & component library
- Site-wide patterns — header, footer, closing CTA

Part 2 — Page-by-page

- 01 Home
- 02 About
- 03 Software Development
- 04 ERP & CRM Implementation
- 05 Staffing Solutions
- 06 Lead Generation Services
- 07 Digital Marketing Services
- 08 Website Development
- 09 AI Agent Development (headline service)
- 10 Product — Dharwin OS
- 11 Careers
- 12 Contact

Part 3 — Operations

- Asset checklist
- Client information requests (consolidated)

Brand Voice

Voice direction: **traditional services-firm corporate**. Third-person, formal cadence, institutional vocabulary, complete sentences. Reference set: Cognizant, Mphasis, Mindtree, Tata Consultancy, Infosys.

VOICE ATTRIBUTES — locked

Attribute	Application in copy
Corporate	Third-person throughout. Complete sentences, formal cadence, institutional pronouns.
Polished	Measured, considered, never breathless. Sentences resolve cleanly. Adjectives chosen for precision.
Authoritative	Speaks from a position of established expertise. Claims supported by quantified evidence.

DO

- Write in third person. *Dharwin Business Solutions delivers... Our team partners with... Our clients receive...*
- Use complete, formal sentences. Avoid fragments and conversational shorthand.
- Capitalize Dharwin's service lines and proprietary frameworks: *Software Development, ERP & CRM Implementation, The Dharwin Approach, Dharwin OS*.
- Use institutional vocabulary: *clients, organizations, enterprises, engagements, capabilities, outcomes*.
- Quantify claims with specific figures: *within eight-to-twelve-week development cycles, five business days to shortlist, thirty-day deployment framework*.
- Anchor every service description in the structural mechanic — what is delivered, on what timeline, with what model.

DO NOT

- Address the reader in second person on the live site. *You get...* and *Tell us what you're trying to build* — both banned.
- Use sentence fragments for rhythm. *Operators, not consultants.* — rewrite as a complete sentence.
- Use contractions in formal copy. *Don't* → *Do not*. *We've* → *We have*. Acceptable in testimonials only.
- Stack adjectives without purpose. *Comprehensive, robust, end-to-end, scalable solutions* — pick the most accurate term.
- Make unsupported emotional claims. *World-class, best-in-class, industry-leading* — only when external recognition exists.

BANNED TERMS

Leverage · synergy · cutting-edge · innovative (standalone) · one-stop shop · paradigm shift · holistic · touch base · circle back · low-hanging fruit · next-generation (without specificity) · disruptive.

Design System — Color & Typography

Color and typography are the design system's two highest-leverage decisions. Everything below is locked. Build Figma styles from these tokens before laying out any page.

COLOR SYSTEM

Token	Hex	Use
--ink	#0B1020	All body text, headlines, primary UI
--paper	#FAF8F4	Page background — warm off-white
--paper-elevated	#FFFFFF	Cards, modals, the rare elevated surface
--ember (accent)	#C2410C	CTAs, hover underlines, one editorial accent per page
--ember-soft	#FCE7D8	Tag chips, NEW pills, subtle highlights
--muted	#5C627A	Secondary text, captions, labels
--rule	#E5E2D9	Dividers, table borders, faint outlines
--ink-90	#1A1F36	Footer and dark-section background

Dark sections use `--ink-90` background, `--paper` text, `--ember` accent. One to two per page maximum. The Product (Dharwin OS) page hero uses a full-bleed dark treatment.

TYPOGRAPHY

Family	Use
Fraunces (display)	H1, H2, hero numerals, pull quotes. Variable, Google Fonts.
Inter (body)	All body, buttons, captions, navigation. Variable, Google Fonts.
JetBrains Mono	Inline code, technical specs, footer metadata. Google Fonts.

Token	Family	Size	Wt	Line height	Tracking
display/hero	Fraunces	80–96px desktop · 48 mobile	400	1.02	-2%
display/h2	Fraunces	56–64px desktop · 36 mobile	400	1.08	-1.5%
display/h3	Fraunces	32–40px desktop · 26 mobile	500	1.15	-1%
body/large	Inter	20–24px	400	1.55	0
body/base	Inter	17–18px	400	1.6	0
body/small	Inter	14–15px	400	1.5	0
label/kicker	Inter	12px	600	1.2	+12% uppercase
mono/caption	JetBrains Mono	12–13px	400	1.4	0

Hero numerals (stats, years, counts) — Fraunces 96–160px, weight 400, ember accent. Big numbers are the brand.

Spacing, Grid & Motion

SPACING — 8PX BASE

Base unit = 8px. All vertical rhythm is multiples of 8. Section padding never less than 96px desktop / 64px mobile, often 160px on hero sections.

space/1	8px
space/2	16px
space/3	24px
space/4	32px
space/5	48px
space/6	64px
space/7	96px
space/8	128px
space/9	160px
space/10	200px

GRID

- **Desktop:** 12 columns · 1280px max content width · 80px outer gutter · 24px column gap.
- **Tablet:** 8 columns · 64px outer gutter · 16px column gap.
- **Mobile:** 4 columns · 24px outer gutter · 16px column gap.
- Headlines may break the column grid on hero sections (deliberate magazine-layout move).

MOTION SYSTEM

Pattern	Duration	Easing	Where
Page transition	400ms	cubic-bezier(0.16,1,0.3,1)	Route changes — fade + 8px lift
Section reveal on scroll	600ms · 80ms stagger	(same)	Each section as it enters viewport
Hero text reveal	800ms · 60ms / word	(same)	Hero only, runs once
Hover (links + CTAs)	200ms	ease-out	Color shift + underline draw
Marquee	continuous 40s loop	linear	Logo strips only
Number count-up	1.2s	ease-out	Stat blocks on view

Banned: parallax beyond 5%, scroll-jacking, kinetic typography that animates per character on every paragraph, mouse-cursor trails, anything that delays content from being readable.

Component Library

Build these once in Figma. Pages compose them. Component build order is in Part 3. Pages 12 land in 1–2 days each once the component library exists.

Component	Description
Header (sticky)	Transparent over light hero, opaque after 80px scroll. Logo-left, nav-centre, CTA-right. Mobile: hamburger → full-screen nav.
Footer	Multi-column, --ink-90 background, large brand mark, manifesto line, links, address, response-time pledge.
Hero/Editorial	Asymmetric — H1 spans 8 cols, subhead spans 5 cols, CTA below. Optional eyebrow kicker above.
Hero/Split	50/50 — copy left, visual right. Visual can be image, video, or product UI mock.
CTA/Primary	Ember background, paper text, 56px height, Inter 16/600, 8px radius. Arrow trails text — animates +4px right on hover.
CTA/Secondary	Ink text on transparent, ember-coloured underline-on-hover, no fill.
CTA/Banner	Full-bleed dark section. H2 + body + primary CTA + secondary CTA. Appears as closing element on most pages.
Card/Service	Paper-elevated background, 32px padding, label kicker top, H3 title, body, Learn More → link bottom. Hover: 4px lift + shadow.
Card/Case study	Magazine-style — large image top (16:9 or 4:5), eyebrow kicker, big H3, 2-line description, customer name + role at bottom.
Card/Person	3:4 portrait, name, role one line below, two-line bio on hover.
Logo strip / marquee	Single row of customer logos at 32px height, slow scroll. Logos muted, full opacity on hover.
Stat block	Big Fraunces numeral + one-line caption. Typically used in trios.
Process steps	Numbered (01, 02, 03...) editorial numerals. Vertical for narrative, horizontal for short series.
Pull quote	Fraunces 48px, ember opening quote glyph, attribution in Inter 14px below.
Accordion / FAQ	Single border-top, big tap target, plus-to-minus icon, smooth height transition.
Form/Inline	Single input + CTA inline, OR stacked block. Floating labels — no placeholder-as-label.
Tag chip	--ember-soft background, ink text, 10×14px padding, 999px radius.
Code spec	JetBrains Mono small caps, --ink-90 tile, --paper text — for technical pages (Software Dev, AI Agent Dev).
Section divider	Single 1px --rule hairline at top of each section, OR kicker-only divider (uppercase label, rule, label, rule).

Site-Wide Patterns

HEADER (sticky)

Structure:

[Dharwin] Home About Solutions ■ Product Careers Contact [Schedule a Consultation →]

- Logo is a custom wordmark in Fraunces — *Dharwin*, italic, weight 400. Drop "Business Solutions" lockup from header to save space; keep in footer.
- Nav items in Inter 15/500. Active item gets a 1px ember underline.
- Solutions dropdown opens on hover (300ms delay). On click, navigates to first item. Inside dropdown: 2-column layout — 7 services left, small illustrated promo block right (*New: AI Agent Development* →).
- CTA stays ember on light hero, becomes outlined ember on dark sections.
- Mobile: full-screen overlay with same structure, animated reveal.

© 2026 Dharwin Business Solutions · Sheridan, WY · Response within one business day

Manifesto line: *The integrated operating partner for businesses that require software, growth, and talent functions delivered under a single accountable engagement.*

UNIVERSAL CLOSING CTA

Every page that is not */contact* ends with the same closing pattern. Consistency on this section is the most important UX move on the site.

Section: *Let's talk*

Background: --ink-90.

Headline (Fraunces 64px, paper):

Discuss Your Business Requirements with Our Team.

Subhead (Inter 20px, paper):

Schedule a complimentary 30-minute consultation. Our team will provide an honest assessment of engagement fit and, where applicable, recommend alternative resources to support your strategic objectives.

Primary CTA: Schedule a Consultation →

Secondary CTA: Submit a Project Brief →

Page-specific overrides: AI Agent Development swaps secondary to *Engage a Live Demonstration Agent* →. Digital Marketing may swap secondary to *Request the Complimentary Audit* →. Product (Dharwin OS) uses a product-specific closing CTA — see page 10. Careers uses a candidate-focused closing CTA — see page 11.

Home

URL / · Sections 11 · Voice Corporate

Page job: Convince a qualified visitor — in under 30 seconds — that Dharwin is the operating partner they were looking for, then route them into one of seven solutions or the closing CTA.

Meta title: Dharwin Business Solutions | Integrated IT, Growth & Talent · **Section order:** Hero · Trust strip · Positioning paragraph · Solutions grid · Featured case study · The Dharwin Approach · Product spotlight · By the numbers · Testimonial · Headquarters & operations · Closing CTA.

1 — Hero

Empowering Businesses with Integrated IT, Growth, and Talent Solutions.

Eyebrow: INTEGRATED IT · GROWTH · TALENT SOLUTIONS

Subhead: Dharwin Business Solutions partners with SMBs and scaling enterprises across the United States and India, delivering software development, business growth, and workforce capabilities through a single, accountable engagement model.

CTAs: Schedule a Consultation → · Explore Our Capabilities →

Layout: Editorial hero. H1 spans 9 cols, subhead 5 cols. Eyebrow kicker above. Right-third reserved for editorial rest (1px rule, ember dot, date).

Motion: Headline reveals word-by-word, 60ms stagger, runs once.

2 — Trust Strip

Kicker: TRUSTED BY ORGANIZATIONS WORLDWIDE

Layout: Full-bleed marquee. 10–12 client logos at 32px height, 40s slow loop, 40% opacity / 100% on hover.

Asset: 10–12 client logos (Dharwin to provide).

3 — Positioning Paragraph

Modern enterprises face an increasingly complex challenge: managing technology development, growth strategy, and talent acquisition while maintaining focus on core operations. Dharwin Business Solutions addresses this challenge through a unified service model that delivers integrated software, growth, and staffing capabilities under a single accountable engagement.

Layout: Single column, 720px max-width, centred. Fraunces 40px, leading 1.2, 160px top/bottom padding. No CTA.

4 — Solutions Grid

Kicker: OUR SOLUTIONS · **Section heading:** Comprehensive Capabilities Across Seven Service Lines.

#	Service	Value proposition
01	Software Development	Custom enterprise applications, internal tools, and APIs engineered within 8–12-week development cycles.
02	ERP & CRM Implementation	Zoho, Salesforce, and HubSpot implementations executed on a 30-day deployment framework.
03	Staffing Solutions	Specialized IT and non-IT talent acquisition — qualified shortlists within five business days.
04	Lead Generation Services	Strategic outbound campaigns engineered for qualified sales meetings, without in-house SDR overhead.
05	Digital Marketing Services	Performance-driven engagements led by industry practitioners, with a complimentary growth audit.
06	Website Development	Conversion-optimized websites within 4–6-week cycles, on the platform that fits client capability.
07	AI Agent Development · NEW	Production-grade voice and conversational agents for qualification, scheduling, and CRM integration.

Layout: Asymmetric 3+2+2 magazine grid. Card: mono label (01 / SOFTWARE), Fraunces H3, Inter 18 value prop, Learn More →. AI Agent card gets a NEW ember pill, top-right.

5 — Featured Case Study

Transforming Quote-to-Cash Operations for a Leading Logistics Provider.

Kicker: CLIENT SUCCESS STORY • LOGISTICS • CHENNAI, 2026

Body (~85 words): Atlas Logistics, a Chennai-based logistics operator, sought to address significant inefficiencies in their quote-to-cash workflow... Dharwin engineered and deployed a custom internal application within eight weeks, automating request ingestion, dynamic pricing, multi-stage approval routing, and customer-facing quote delivery.

Stat row: 92% Reduction in Quote-to-Cash Cycle · 4× Sales Team Productivity Gain · 8 Weeks Total Project Duration.

CTAs: Read the Full Case Study →

Layout: Magazine split. Left 5 cols 4:5 image, right 7 cols copy.

Asset: Anonymized dashboard screenshot from Chennai engagement.

6 — The Dharwin Approach

One Operating Cadence, Four Stages, Every Engagement.

Kicker: THE DHARWIN APPROACH

01 Discovery — 45-min consultation, candid assessment of fit.

02 Scoping — Written scope within 72 hours.

03 Execution — Two-week sprints, weekly sync, in client systems.

04 Transition — Full handover: documentation, access, source.

Layout: Vertical narrative — numerals 01–04 left in Fraunces 96px, copy right in Inter 18. Sticky kicker on left as visitor scrolls.

7 — Product Spotlight (dark section)

Our Proprietary Operating Platform — Now Available to Select Clients.

Background: --ink-90, paper text.

Kicker: INTRODUCING DHARWIN OS

Subhead: Dharwin OS is the integrated business operations platform on which our own organization operates... now extended to a curated group of enterprise clients.

CTAs: Join the Waitlist → · Learn More About the Product →

Layout: Dark section, full-width. Centred H2 + body + product UI mock + CTAs.

Asset: Dharwin OS dashboard mock (Figma export).

8 — By the Numbers

Kicker: DHARWIN BY THE NUMBERS

Stats (Fraunces 128px digits in ember; Inter 14 captions in muted): 120+ Projects Delivered · 48 Professionals Across Two Geographies · 4 Years Operating · 1 Unified Engagement Model.

Caption: Metrics current as of 2026, updated quarterly.

Layout: Single row of four stat blocks. Mobile: 2×2. Hairlines above and below.

9 — Client Testimonial

“Dharwin replaced the need for three separate vendor relationships within our organization. They deliver the technology, source the talent, and manage outbound business development — consolidating what previously required multiple weekly stakeholder meetings into a single integrated engagement.”

— Priya M., Founder, Atlas Logistics

Layout: Single column, max 800px, centred. Fraunces 40px body, Inter 14 attribution, ember opening quote glyph.

10 — Headquarters & Operations

Two columns. **US Headquarters** — 30 N Gould Street, Sheridan, Wyoming 82801. **India Operations** — distributed delivery team (no registered office); operating hours 9:30 AM – 6:30 PM IST.

Layout: Two-column. No embedded map. India column intentionally describes operational presence without a registered office address.

Asset: Confirmed phone numbers for US HQ and India operations.

11 — Closing CTA (universal pattern)

See **Universal Closing CTA** on page 7.

Layout: Background --ink-90. Schedule a Consultation → / Submit a Project Brief →.

About

URL /about · Sections 9 · Voice Corporate

Page job: Establish institutional credibility — origin, principles, leadership, operating scale — sufficient for a qualified prospect to advance to a consultation request.

Section order: Hero · Company origin · Operating principles · Leadership · Our practice · Operating cadence · By the numbers · Recognition & partnerships · Closing CTA.

1 — Hero

An Integrated Services Firm for SMBs and Scaling Enterprises.

Eyebrow: ABOUT DHARWIN BUSINESS SOLUTIONS

Subhead (~75 words): Dharwin Business Solutions was founded in 2022 to address a structural inefficiency observed across mid-market organizations: the requirement to engage and coordinate multiple specialist firms — for software, growth, and talent — when a single accountable team can deliver equivalent or superior outcomes.

Layout: Editorial hero. Right-third reserved for leadership portrait (4:5 crop). No CTA — the page is the trust pitch.

Asset: Leadership portrait (Dharwin to provide).

2 — Company Origin

Built to Address a Pattern Observed Across the Mid-Market.

Body (~150 words): Prior-firm pattern recognition; recurring three-vendor coordination overhead; Dharwin established to consolidate. Refined since 2022 across 32 client organizations across logistics, financial services, healthcare, education, real estate, consumer technology.

Pull quote: A single accountable engagement consistently outperforms coordinated multi-vendor delivery.

Layout: Single column, 720px max. Drop-cap on first letter (Fraunces, ember, 120px). Pull quote breaks the column mid-page.

3 — Operating Principles

Headline: Three Principles That Govern Every Engagement.

01 **Production Delivery, Not Advisory Output.** Operational deliverables — code, campaigns, candidates, implementations.

02 **Operators Lead Client Engagements.** Personnel with prior operational experience in the relevant function.

03 **Engagements Earn Renewal.** Initial engagements at minimum scope; continued engagement reflects demonstrated value.

Layout: Three blocks stacked. Huge Fraunces numeral (200px, ember), H3 principle, three-line body. Hairlines between.

4 — Leadership

Headline: The Team Accountable for Client Engagements.

One large card per founder. 4:5 portrait, name, title, two-paragraph executive bio, operational responsibility line.

Layout: Section hidden on the live site until all leadership assets (names, titles, bios, 4:5 portraits) delivered.

Asset: Founder profile(s): name, title, bio (2 paragraphs), 4:5 portrait — Dharwin to provide.

5 — Our Practice (team grid)

Kicker: OUR PRACTICE · 48 PROFESSIONALS ACROSS TWO GEOGRAPHIES

Headline: A Distributed Team Organized Around Client Outcomes.

Body: Seven service lines, each led by a senior practitioner. Deployment based on functional fit, sector experience, availability.

Layout: 5×N grid of square portraits with name + role on hover. Maximum 30 portraits on screen; beyond that, closing tile reading + {N} additional team members.

Asset: Team portraits + names + roles (Dharwin to provide).

6 — Operating Cadence

Distributed Operations, Synchronous Decision-Making.

Body (~80 words): Asynchronous-by-default; weekly sync, daily standups in relevant time zone, biweekly sprint demos, quarterly leadership offsites.

Layout: Split — left 4 cols image (operational photography), right 6 cols copy.

Asset: Operational photography — workspace, team in working context. Not staged stock.

7 — By the Numbers

120+ Projects Delivered · 48 Professionals · 32 Active Client Engagements · 4 Years of Operation.

Note: 32 Active Client Engagements substitutes Home's 1 *Unified Engagement Model*. About is the surface for harder operational scale.

Layout: Single row of four stat blocks. Mobile 2×2. Hairlines above and below.

8 — Recognition & Partnerships

Static logo row (implementation partners — Zoho, Salesforce, HubSpot, etc.). Optional 3-card press grid.

Layout: Section hidden until at least three confirmed entries exist (partnerships or press, any combination).

Asset: Confirmed partnership tier + certifications, press mentions if any.

9 — Closing CTA (universal)

See **Universal Closing CTA** on page 7.

Software Development

URL /software-development · Sections 10 · Voice Corporate

Page job: Convert a technology buyer at an SMB or scaling enterprise into a scoped consultation request.

Section order: Hero · Capabilities · Technology stack · The Dharwin Approach · Engagement models · Industries served · Featured case study · Engagement economics · FAQ · Closing CTA.

1 — Hero

Production-Grade Software Engineering, Delivered on Defined Timelines.

Eyebrow: SOFTWARE DEVELOPMENT

Subhead: *Dharwin Business Solutions delivers custom enterprise applications, internal tools, and APIs through structured eight-to-twelve-week development cycles. Engagements led by senior practicing engineers with prior product development experience. Clients retain full ownership of source code, IP, and infrastructure.*

CTAs: Schedule a Consultation → · See Sample Work →

Layout: Split hero. Left 6 cols copy, right 6 cols anonymized product UI screenshot.

Asset: Anonymized dashboard screenshot from delivered engagement.

2 — Capabilities

Six categories: SaaS Platforms · Internal Tools · Web Applications · Mobile Applications · API Development · System Integrations.

Layout: 3-col card grid. Each card: small line-art icon (ember, 24px), Fraunces H3, Inter 18 body.

3 — Technology Stack

Headline: *An Opinionated, Modern, Production-Proven Stack.*

Layers: Frontend (Next.js · React · TypeScript · Tailwind) · Backend (Node · NestJS · Python · PostgreSQL · Redis) · Mobile (React Native · Expo · Swift · Kotlin) · Cloud (AWS · Vercel · Cloudflare) · Tooling (GitHub · Linear · Datadog · Sentry).

Layout: Logo grid grouped by category. Logos at 24px, muted, full opacity on hover.

4 — The Dharwin Approach (software engagements)

Reuses the four-stage methodology (Discovery / Scoping / Execution / Transition), scoped to software.

Layout: Vertical narrative — numerals left in Fraunces 96px, copy right.

5 — Engagement Models

Three structures:

Sprint — bounded software engagements, 8–12 weeks, flat-fee. Discovery, scope, design, dev, deploy, 30-day support.

Studio — continuous development under dedicated team, open-ended, 3-month minimum. Quarterly planning, biweekly demos.

Embedded — senior Dharwin engineer in client's existing team. Monthly retainer.

Layout: Three columns side by side (mobile: stacked). Each card carries: Schedule a Consultation →.

6 — Industries Served

Chips: Financial Services · Logistics · Software-as-a-Service · Healthcare · Direct-to-Consumer · Real Estate · Education · Manufacturing.

Hover surfaces: {N} engagements delivered.

Layout: Single horizontal row of industry chips. Hover tooltip per chip.

7 — Featured Case Study

Engineering a Production Lending Origination Platform for a Regional Financial Services Provider.

Kicker: CLIENT SUCCESS STORY · FINANCIAL SERVICES · MUMBAI, 2026

Different from Home's Atlas Logistics case — second proof point for visitors moving Home → Software.

Stat row: 12 Weeks From Discovery to Deployment · 3 Legacy Systems Consolidated · 4× Origination Throughput vs. Legacy Environment.

Layout: Magazine split.

Asset: Anonymized product screenshot.

8 — Engagement Economics

Sprint flat-fee, 30% commitment at signing. Studio/Embedded monthly retainer.

Indicative: MVP Sprint from \${X}; Production Launch Sprint from \${Y}.

Layout: Two-column. Left H2 + body; right small "starting from" anchor with caveat list.

Asset: Indicative starting figures (Dharwin to provide, or reframe to "Pricing on Request").

9 — Frequently Asked Questions

8 questions covering: IP/source ownership · personnel selection · departure contingency · NDA/DPA · direct hire conversion · work location (US/India) · out-of-scope categories · mid-engagement scope adjustments.

Layout: *Accordion. Plus-to-minus icon. Smooth height transition.*

10 — Closing CTA (universal)

See **Universal Closing CTA** on page 7.

ERP & CRM Implementation

URL /erp-crm-implementation · Sections 10 · Voice Corporate

Page job: Convert an operations leader — frequently with a prior unsuccessful implementation partner — into a scoping call.

Section order: Hero · The implementation challenge · Platforms implemented · Implementation scope · The 30-day rollout · Featured case study · Industries served · Engagement economics · FAQ · Closing CTA.

1 — Hero

Enterprise Implementations Delivered on a Thirty-Day Framework.

Eyebrow: ERP & CRM IMPLEMENTATION

Subhead: Zoho, Salesforce, HubSpot, and Microsoft Dynamics implementations for SMBs and mid-market organizations. Scoped, configured, integrated, migrated, and transitioned to live operations within a thirty-day deployment cycle.

CTAs: Schedule a Scoping Call → · Review the 30-Day Framework →

Layout: Centred editorial hero. No image. Headline carries the design weight.

2 — The Implementation Challenge

Enterprise Platform Implementations Frequently Underdeliver Against Expectations.

Body (~140 words): Pattern across SMBs and mid-market that have engaged previous implementation partners — six months later, multiple concurrent CRM invoices, continued spreadsheet workarounds, limited adoption. Diagnostic framing: configuration breadth over adoption depth, excess customization, deferred change management.

Layout: Single-column editorial. 720px max-width. Generous padding above and below.

3 — Platforms Implemented

Logo row (48px): Zoho · Salesforce · HubSpot · Microsoft Dynamics · Odoo · NetSuite.

Hover surfaces: {N} clients · {N} implementations · {N} avg days to live.

Layout: Logo row with platform-specific hover state.

Asset: Platform certification badges per partner tier.

4 — Implementation Scope (Included / Outside)

Two-column Yes/No table. **Included:** Platform configuration · Data migration · Workflow automation · Training · 90-day post-launch support · Documentation. **Outside:** Re-platforming · Custom development of unrelated tools · Functional scope outside agreed scope · Ongoing admin beyond 90 days · License procurement.

Layout: Two-column. Explicit boundaries reduce scope-creep concern for buyer.

5 — The 30-Day Rollout

Week 1 Audit & Lock — current-state audit, process mapping, scope lock.

Week 2 Build — configuration, workflow automation, two priority integrations.

Week 3 Migrate & Integrate — data migration, remaining integrations, UAT with named users.

Week 4 Train & Launch — full training (live + recorded), go-live on Day 28, 60-day support window opens.

Layout: Horizontal timeline. Sticky header. Inline downloadable PDF of the 30-day plan optional.

6 — Featured Case Study

Consolidating Customer Relationship Management Operations for a Regional Manufacturing Enterprise.

Kicker: CLIENT SUCCESS STORY · MANUFACTURING · PUNE, 2026

Stat row: 30 Days From Initiation to Live · 3 Legacy Systems Consolidated · 89% User Adoption Within 60 Days.

Layout: Magazine split.

Asset: Post-implementation environment screenshot.

7 — Industries Served

Chips: Manufacturing · Financial Services · Healthcare · Real Estate · Logistics · D2C · Education · Professional Services.

Layout: Single horizontal chip row, hover per chip.

8 — Engagement Economics

Flat-fee scoped against platform, modules, integrations, data complexity. 30% commitment at signing.
Indicative: Zoho from $\$X$; Salesforce from $\$Y$; HubSpot from $\$Z$.

Layout: Two-column. Left body, right "starting from" anchor.

9 — Frequently Asked Questions

7 questions: adoption contingency · GDPR/DPA · operating alongside internal admin · scope of historical data migration · license procurement · 30-day timeline at risk · implementation vs ongoing managed services.

Layout: Accordion.

10 — Closing CTA (universal)

See **Universal Closing CTA** on page 7.

Staffing Solutions

URL /staffing-solutions · Sections 9 · Voice Corporate

Page job: Capture a live role specification from a hiring leader on the page itself. The role-submission form is the hero.

Section order: Hero (form-led) · Engagement models · Roles supported · Sourcing timeline · Candidate quality framework · Featured case study · Engagement economics · FAQ · Closing CTA.

1 — Hero (form-led)

Specialized Talent Acquisition With Five-Business-Day Shortlist Delivery.

Subhead: IT and non-IT functions. Average shortlist delivery five business days from receipt of role specification. Contract, dedicated, or contract-to-hire arrangements with full payroll administration through Dharwin's operating entities in the US and India.

Form heading: Submit a Role Specification.

Fields: Role Title · Seniority (dropdown) · Location/Remote · Required Start Date · Engagement Type (radio) · Company Email.

Submit: Submit the Specification →. **Below submit:** Or schedule a 15-minute consultation →.

Layout: Split hero. Left 6 cols copy, right 6 cols form. The form REPLACES the standard CTA button — it IS the CTA.

2 — Engagement Models

Contract — burst capacity, time-boxed, hourly/monthly under Dharwin's payroll.

Dedicated — full-time allocation, named seat. Compensation/benefits under monthly retainer.

Contract-to-Hire — 3–6 month contract, client-side direct hire on mutual conversion terms.

Layout: Three large cards.

3 — Roles Supported

Kicker: 100+ ROLES DELIVERED · 32 CLIENT ENGAGEMENTS · TWO GEOGRAPHIES

IT: Full-Stack · Frontend · Backend · DevOps · QA/SDET · Product Designer · Product Manager · Data Engineer · Mobile · Solution Architect.

Business Ops: SDR · CS Specialist · Operations Analyst · Virtual Assistant · Admin Coordinator · Bookkeeping · Marketing Coordinator.

Layout: Two-column — IT left, Business Operations right. Role chips clickable, expanding to same-page detail.

4 — Sourcing Timeline

Stat: 5 BUSINESS DAYS · AVERAGE SHORTLIST DELIVERY

Day 0 Specification → Day 1–3 Sourcing → Day 3–5 Screening & Assessment → Day 5 Shortlist Delivery → Day 5–14 Client Interviews.

Layout: Horizontal timeline.

5 — Candidate Quality Framework

Four stages: 01 Source · 02 Screen · 03 Assess · 04 Shortlist. Each stage 60 words.

Layout: Sticky-scroll narrative — pinned visual left, four scrolling description blocks right.

6 — Featured Case Study

Scaling an Engineering Organization Through a Structured Talent Acquisition Engagement.

Kicker: CLIENT SUCCESS STORY · SOFTWARE-AS-A-SERVICE · BENGALURU, 2026

Stat row: 22 Qualified Shortlists Delivered · 9 Permanent Placements · 4 Months Engagement Duration.

Layout: Magazine split.

7 — Engagement Economics

Monthly retainer per seat (Contract / Dedicated) inclusive of payroll. Contract-to-Hire: standard retainer + conversion fee equal to one month of total candidate compensation. No fees for sourcing — commercial obligations begin at candidate placement and start date.

Layout: Two-column.

8 — FAQ

7 questions: payroll/statutory contributions entity · interview availability · replacement guarantee · time-zone allocation · executive search · minimum dedicated scope · NDA/IP for placed personnel.

Layout: Accordion.

9 — Closing CTA (universal)

See **Universal Closing CTA** on page 7.

Lead Generation Services

URL /lead-generation-services · Sections 9 · Voice Corporate

Page job: Convert a commercial leader — frequently with a prior unsuccessful outbound engagement — into a strategy call.

Section order: Hero · The outbound challenge · Engagement framework · Channels operated · The first 30 days · Featured case study · Engagement economics · FAQ · Closing CTA.

1 — Hero

Outbound Demand Generation Measured Against Qualified Sales Meetings.

Subhead: Structured outbound demand generation — ICP definition, prospect identification, multi-channel outreach, integrated meeting handoff. Measured against qualified meetings booked, not message volume. Operated by senior outbound practitioners.

CTAs: Schedule a Strategy Call → · Review the Engagement Framework →

Layout: Standard editorial hero.

2 — The Outbound Challenge

Outbound Lead Generation Engagements Frequently Optimize Against the Wrong Metric.

Body (~140 words): Diagnostic of the pattern — high message volume, limited qualified meetings, weak ICP fit. Internal SDR ramp issues. Dharwin's framework optimizes against qualified meetings booked.

Layout: Single-column editorial. 720px max-width.

3 — Engagement Framework

Six stages: 01 ICP Definition · 02 Prospect List Development · 03 Outreach Sequence Development · 04 Campaign Execution · 05 Meeting Qualification · 06 Handoff & Continuity.

Layout: Horizontal scroll on desktop, vertical stack on mobile.

4 — Channels Operated

Four channels with indicative qualified response rates:

Email (2–4%) · LinkedIn (5–8%) · Outbound Calling (3–6%) · WhatsApp Business · India operations (8–12%).

Layout: Four-card grid.

5 — The First 30 Days

Week 1 Strategy & ICP · Week 2 List & Sequence Development · Week 3 Campaign Launch · Week 4 Optimization & Initial Delivery. First qualified meetings typically delivered Week 3–4.

Layout: Horizontal timeline (reuses the 30-day-rollout component).

6 — Featured Case Study

Establishing a Qualified Sales Pipeline for a Business-to-Business Software Company.

Kicker: CLIENT SUCCESS STORY · B2B SOFTWARE · NEW YORK, 2026

Stat row: 87 Qualified Sales Meetings · 41% Conversion to Pipeline · 6 Months Engagement Duration.

Layout: Magazine split.

7 — Engagement Economics

Monthly retainer scoped against channel selection, prospect list scale, qualified-meeting target. Indicative scale: monthly retainer commensurate with the loaded cost of a single internal SDR. Pay-per-qualified-meeting available after initial 3-month retainer.

8 — FAQ

7 questions: outreach copy ownership · sending infrastructure · deliverability (SPF/DKIM/DMARC) · GDPR/CAN-SPAM compliance · performance contingency · CRM dependency · qualified-meeting exclusion criteria.

Layout: Accordion.

9 — Closing CTA (universal)

See **Universal Closing CTA** on page 7.

Digital Marketing Services

URL /digital-marketing-services · Sections 9 · Voice Corporate

Page job: Convert a marketing leader into requesting the complimentary 48-hour operational audit. The audit is the offer.

Section order: Hero (offer-led) · The complimentary audit · Channels operated · The Dharwin Approach · Featured case study · Tools operated · Engagement economics · FAQ · Closing CTA.

1 — Hero (offer-led)

Performance Marketing Engagements Initiated With a Complimentary Operational Audit.

Subhead: Performance-driven engagements across paid acquisition, SEO, content development, and lifecycle marketing. Preceded by a complimentary 48-hour operational audit of the existing acquisition funnel — provided without commercial commitment.

CTAs: Request the Complimentary Audit → · Review a Sample Engagement →

Layout: Standard editorial hero. Primary CTA = audit request = page's central conversion event.

2 — The Complimentary Audit

A Structured 48-Hour Operational Audit of the Existing Acquisition Funnel.

What the audit includes: Documented assessment of acquisition funnel · channel-by-channel benchmark · three specific optimization recommendations with expected impact · 30-minute review session with client leadership · written deliverable provided regardless of subsequent engagement.

Layout: Single-column block. Paper-elevated card with hairline border. 720px max-width.

3 — Channels Operated

Paid Acquisition · Search Engine Optimization · Content Development · Lifecycle Marketing · Marketing Operations.

Layout: 3-col card grid (mobile: stacked).

4 — The Dharwin Approach (digital marketing)

Reuses the four-stage methodology, scoped to performance marketing engagements.

Layout: Vertical narrative.

5 — Featured Case Study

Reducing Customer Acquisition Cost for a Direct-to-Consumer Consumer Goods Brand.

Kicker: CLIENT SUCCESS STORY · D2C · DELHI, 2026

Stat row: 52% Reduction in CAC · 38% Increase in Monthly New-Customer Volume · 6 Months Engagement Duration.

Layout: Magazine split.

6 — Tools Operated

Paid Acquisition: Google Ads · Meta · LinkedIn · TikTok.

Analytics & Attribution: GA4 · Mixpanel · Amplitude · Segment.

Marketing Automation: HubSpot · Marketo · Customer.io · Klaviyo.

Content Operations: WordPress · Webflow · Contentful · Notion.

Measurement & Reporting: Looker Studio · Tableau · Google Tag Manager · GA4.

Layout: Logo grid grouped by category.

7 — Engagement Economics

Monthly retainer scoped against channel allocation, campaign development scope, and performance targets. Paid media management fees separate from media spend (procured directly by client). 3-month commitment to start, month-to-month thereafter.

8 — FAQ

7 questions: retainer scope · media procurement · performance measurement · performance shortfall contingency · operating within existing stack · B2B/B2C support · standard engagement initiation timeline.

Layout: Accordion.

9 — Closing CTA

Universal pattern; secondary CTA may be substituted with *Request the Complimentary Audit* → to reinforce the audit offer.

Website Development

URL /website-development · Sections 9 · Voice Corporate

Page job: Convert a founder or marketing leader into a project enquiry, with platform recommendation as a discriminating capability.

Section order: Hero · Categories · Platform selection · Development process · Featured engagement (before/after) · Maintenance & support · Engagement economics · FAQ · Closing CTA.

1 — Hero

Conversion-Optimized Website Development on a Four-to-Six-Week Delivery Cycle.

Subhead: Marketing websites, landing page campaigns, eCommerce environments, and custom CMS implementations — on the platform best suited to client team capability, operational requirements, and long-term maintainability.

CTAs: Initiate a Project → · See Sample Engagements →

Layout: Standard editorial hero.

2 — Categories

Six categories: Marketing Websites · Landing Page Campaigns · eCommerce Platforms · Headless CMS · Membership & Portal Environments · Site Migrations.

Layout: 3-col card grid.

3 — Platform Selection

Comparison table: Webflow (\$\$) · Framer (\$\$) · WordPress (\$) · Shopify (\$\$) · Next.js custom (\$\$\$) · Wix Studio (\$\$). Per platform: suitable for, ongoing maintenance ownership, order of magnitude monthly cost.

Caption: Dharwin remains commercially neutral on platform selection.

Layout: Comparison table. Decision-support content.

4 — Development Process

Five stages across 4–6 weeks: 01 Brief & Discovery (Week 1) · 02 Wireframing (Week 1–2) · 03 Design (Week 2–3) · 04 Build (Week 3–5) · 05 Launch (Week 5–6).

Layout: Horizontal scroll.

5 — Featured Engagement (before / after)

Relaunching a Corporate Marketing Surface for a B2B Technology Provider.

Kicker: CLIENT SUCCESS STORY · MARKETING WEBSITE RELAUNCH · AUSTIN, 2026

Stat row: 5 Weeks From Initiation to Launch · 87/100 Core Web Vitals Performance Score · 64% Reduction in Bounce Rate.

Layout: Before/after slider — drag divider to reveal pre-launch and post-launch states.

Asset: Pre-launch and post-launch screenshots.

6 — Maintenance & Support

Three tiers:

Self-Serve (\$): Quarterly platform review · technical issue escalation · documentation access.

Managed (\$\$): Monthly content updates · performance monitoring · SEO maintenance · quarterly review.

Embedded (\$\$\$): Dedicated development capacity · weekly status review · continuous improvement against roadmap.

Layout: Three cards.

7 — Engagement Economics

Flat-fee scoped against category, platform, page count, integration surface. 30% commitment at signing. Indicative: Marketing Website from \$X · Landing Page from \$Y · eCommerce from \$Z · Site Migration from \$A. Maintenance from \$B/month (Self-Serve).

8 — FAQ

7 questions: content provision · design review cycles · CMS interface per platform · performance/accessibility (Core Web Vitals, WCAG 2.1 AA) · hosting/domain/SEO · minimum engagement scope · brand asset integration.

Layout: Accordion.

9 — Closing CTA (universal)

See **Universal Closing CTA** on page 7.

AI Agent Development · HEADLINE SERVICE

URL /ai-agent-development · Sections 11 · Voice Corporate

Page job: Convert an AI-curious commercial or operational leader into a demonstration walkthrough — supplemented by a live in-browser demonstration agent.

Section order: Hero (with live demo) · Agent capability framework · Three agent categories · Capabilities & technology stack · Live demonstration · Development process · Industry use cases · Security & compliance · Engagement economics · FAQ · Closing CTA.

Strategic positioning: This is the most ambitious page on the site. Length, depth, and live demonstration capability are deliberately greater than peer service pages.

1 — Hero (with live demo)

Production-Grade AI Agents for Customer Engagement and Operational Workflow Automation.

Eyebrow: AI AGENT DEVELOPMENT · NEW SERVICE

Subhead: *Production-grade voice and conversational AI agents integrated with client CRM, knowledge bases, and operational tools. Engineered for qualification, scheduling, transaction execution, and structured workflow automation.*

CTAs: Schedule a Demo Walkthrough → · Engage a Live Demonstration Agent →

Layout: Split hero. Left 5 cols copy, right 7 cols embedded live voice-agent demonstration — phone-style UI with Initiate Demonstration Call button. Browser WebRTC, 60-second sample conversation.

Asset: Production demonstration agent deployed via WebRTC. Fallback: captioned 30-second video.

2 — Agent Capability Framework

A Functional Definition of the Modern AI Agent.

Body (~130 words): Definition of an AI agent as a system that conducts structured conversations, interprets stated/implied requirements, and executes operational actions. Three distinguishing characteristics: structured client-system access, contextual multi-turn reasoning, documented escalation behavior with human review.

Layout: Single-column editorial. 720px max-width. Drop-cap on first letter.

3 — Three Agent Categories

01 Voice Agents — voice-native telephony agents. Twilio/LiveKit/Plivo. Inbound support, qualification, scheduling, outbound campaigns.

02 Conversational Agents — text-based on web/mobile/WhatsApp/Slack. Support deflection, lead capture, internal knowledge base.

03 Workflow Agents — non-conversational, event-triggered. Invoice processing, contract review, data extraction.

Layout: Three editorial blocks. Giant Fraunces numeral, category title, description, applications.

4 — Capabilities & Technology Stack

Capabilities: streaming voice, multilingual, RAG, structured tool execution, human handoff, real-time analytics, multi-tenant.

Stack: Voice (Twilio · LiveKit · Plivo) · STT (Deepgram · Whisper) · LLM (OpenAI · Anthropic · Gemini) · TTS (ElevenLabs · Cartesia) · Vector (Postgres+pgvector · Pinecone) · Orchestration (LiveKit Agents · LangGraph · custom).

Layout: Two-column. Left capability list, right stack table.

5 — Live Demonstration

Engage a Production Demonstration Agent in Your Browser.

Body: Live demonstration voice agent. Sample scripts across appointment scheduling, lead qualification, product information. Browser WebRTC. No installation, no account.

Sample script chips: Schedule an appointment · Inquire about service pricing · Request product information.

CTAs: Initiate Demonstration Call →

Layout: Full-bleed dark section. Device-mockup phone centred. Live conversation transcript scrolls below the device.

Asset: Production demonstration agent.

6 — Development Process

Five stages: 01 Conversation Mapping · 02 Tool Integration · 03 Knowledge Base Training · 04 Conversation Testing · 05 Production Deployment.

Layout: Vertical narrative — five-step process pattern.

7 — Industry Use Cases (3×3 grid)

Industries with sample conversation framing:

Logistics — shipment status & rescheduling · Healthcare — appointment scheduling & verification · Real Estate — property inquiry & viewing.

Financial Services — loan inquiry & document collection · SaaS — support deflection & ticket triage · D2C — order status, returns, lifecycle.

Education — course inquiry & enrollment · Manufacturing — order tracking & reorder · Professional Services — engagement inquiry & consultation.

Layout: 3×3 grid.

8 — Security & Compliance

Six tiles: Data Residency (US/EU/India and others) · Encryption (in-transit + at-rest) · Recording Consent (jurisdictional frameworks) · Telephony Compliance (TCPA, TRAI, GDPR) · Audit Logging · Human Handoff Guarantee.

Layout: 6-tile grid. 2 lines per tile.

9 — Engagement Economics

Three components: **Discovery & Agent Design** (flat fee). **Build** (flat fee per agent — scoped against conversation surface complexity, tool integration count, knowledge base scale). **Runtime** (usage-based — per minute or per conversation — pass-through of AI vendor costs + Dharwin margin).

10 — Frequently Asked Questions

8 questions: conversation latency (sub-1.2s end-to-end) · runtime cost · language support · low-confidence escalation · deployment options (Dharwin-managed vs client environment) · vs standard chatbot · post-deployment monitoring · standard timeline (6–8 weeks single agent).

Layout: Accordion.

11 — Closing CTA (override)

Universal pattern, with **secondary override:** *Engage a Live Demonstration Agent* →.

Product — Dharwin OS

URL /product · Sections 9 · Voice Corporate

Page job: Drive product interest into Early Access Program registration — or into a Dharwin product-team consultation.

Section order: Hero (full-bleed product mock) · The premise · Platform capabilities · Product walkthrough (scroll-pinned) · Intended users · Operational provenance · Early Access Program & pricing · Early access registration · Closing CTA (product-specific override).

1 — Hero (full-bleed product mock)

An Integrated Operating Platform for Modern Business Operations.

Background: --ink-90 full-bleed dark.

Wordmark (Fraunces, large, paper): Dharwin OS.

Subhead: *Dharwin OS is the integrated business operations platform developed by Dharwin Business Solutions for internal use across software, growth, and talent engagements. Unifies CRM, AI-powered conversational agents, workflow automation, and integrated operational reporting — now made available to a curated group of enterprise clients.*

CTAs: Join the Early Access Program →

Layout: Full-bleed dark hero. Below the fold: a 16:9 dashboard mock floats in with subtle drop shadow.

Asset: Primary Dharwin OS dashboard mock (Figma export, paper-on-ink palette).

2 — The Premise

A Platform Engineered From Operational Practice.

Body (~150 words): Four-year operational practice across services lines. Pattern of operational inefficiency exposed at scale. Two years ago Dharwin initiated platform development to address systematically. Currently supports the full operating surface of Dharwin Business Solutions; now extended via Early Access Program.

Layout: Single-column editorial. Background switches back to --paper. 720px max-width.

3 — Platform Capabilities

Three capability surfaces:

01 **Unified Customer Engagement Timeline** — voice/email/messaging/tickets/transcripts in a single per-customer timeline, with AI summarization, classification, next-action recommendation.

02 **Integrated AI Agent Capability** — voice and conversational agents pre-integrated with customer data, knowledge base, operational tools.

03 **Consolidated Operational Visibility** — pipeline, project status, hiring, marketing in one dashboard.

Layout: Three vertical blocks. Each: card-sized UI snippet (Figma export), title, three-line body.

Asset: Three card-sized UI snippets, one per capability.

4 — Product Walkthrough (scroll-pinned)

Three scenes across the working week:

01 **Customer Engagement** — prospect engages voice agent, agent qualifies and books discovery call into sales rep's calendar.

02 **Internal Continuity** — sales rep sees the full conversation, the new opportunity in pipeline, suggested next action.

03 **Executive Visibility** — end-of-week, executive team reviews pipeline, project status, hiring, marketing in one dashboard.

Layout: Sticky-scroll. Product UI mock pinned right (or below on mobile). Three scenes scroll on the left; UI swaps to a different view per scene.

Asset: Three product UI mocks (Figma export), one per scene. Section hidden until all three mocks exist.

5 — Intended Users

Built for: SMBs operating 5–10 platforms across CRM/support/ops · founder-led organizations seeking unified operational visibility · organizations evaluating cumulative cost of specialized subscriptions.

Not built for (current stage): enterprises with deeply customized legacy stacks · organizations of 500+ requiring multi-tenant complexity · teams unwilling to migrate from incumbent CRM.

Layout: Two-column Yes/No.

6 — Operational Provenance

Engineered From Four Years of Operating Practice.

Body (~85 words): Refined continuously since 2024 through Dharwin Business Solutions' own operational use — 120+ projects, 32 active client engagements, 48-person distributed team.

Pull quote: *Early Access Program participants engage with a platform that has already absorbed four years of operational refinement.*

Stat row: 4 Years of Continuous Refinement · 120+ Projects Operationally Supported · 32 Concurrent Client Engagements.

Layout: Editorial single column with mid-section pull quote and stat row.

7 — Early Access Program & Pricing

Limited admission per quarter. Structured onboarding from product team; dedicated configuration support; direct product roadmap input.

Tiers: Foundation (\$X) · Operations (\$Y) · Enterprise (\$Z / Pricing on Request). Early Access participants receive locked pricing for the initial 12 months of engagement.

Layout: Three pricing cards.

8 — Early Access Registration

Form fields: Organization Name · Industry · Org Size · Current CRM Platform · Primary Use Case · Contact Name & Role · Business Email.

Submit: Submit for Early Access Review →.

Below submit: *Submissions are reviewed within five business days. Selected organizations receive a structured onboarding consultation prior to program admission.*

Layout: Centred form block on --paper-elevated. Hairline border. 720px max-width.

9 — Closing CTA (product-specific override)

Discuss Operational Requirements with the Dharwin Product Team.

Background: --ink-90.

Subhead: *Schedule a 30-minute consultation to review your current operational stack, intended use cases, and Early Access Program fit. The Dharwin product team will provide an honest assessment of platform fit prior to any commitment.*

CTAs: Schedule a Product Consultation → · Submit for Early Access Review →

Layout: Substitutes the universal closing CTA. Platform-evaluation context requires different language.

Careers

URL /careers · Sections 9 · Voice Corporate

Page job: Attract operationally aligned candidates into the application pipeline. Equally — surface the working environment with sufficient clarity that misaligned candidates self-select out.

Section order: Hero · Why work at Dharwin · Operating practices · Hiring process · Compensation philosophy · Open roles · What Dharwin does not provide · Operational environment · Closing CTA.

1 — Hero

Building a Distributed Operating Team for Modern Business Services.

Subhead: Dharwin Business Solutions hires across software engineering, product design, growth marketing, sales operations, and platform development. Open roles are listed below. The hiring process is structured to be transparent, time-bounded, and respectful of candidate effort.

CTAs: View Open Roles ↓

Layout: Centred editorial. Full-bleed --paper. No image — the headline carries the hero.

2 — Why Work at Dharwin

Three operating conditions:

01 **Direct Operational Ownership** — accountable for documented outcomes within functional scope.

02 **Operator-Led Practice Structure** — client-facing roles filled by personnel with prior operational experience.

03 **Market-Aligned Compensation** — quarterly benchmarking against US market data (US comp) and India market data (India comp).

Layout: Three editorial blocks. Big Fraunces numeral, title, three-line body.

3 — Operating Practices

Two-week sprint cadence with biweekly demos · async by default, decisions in writing · 15-minute optional recorded standups · performance measured against scope completion, not time · senior practice members maintain active responsibilities (no purely-managerial positions) · structured time-bounded hiring; efficient compensation adjustments · supported transition out with reference availability.

Layout: Bulleted manifesto. One line per item.

4 — Hiring Process

Four stages: 01 Application Submission (structured form, two role-specific questions, no cover letter) · 02 Initial Consultation (30 min, 3–5 days from application) · 03 Capability Assessment (paid, ~4 hours candidate effort, 4–6 days from consultation) · 04 Final Discussion (with the team, 2–3 days from assessment).

Caption: End-to-end timeline 10–14 calendar days. Response provided to every applicant.

Layout: Horizontal timeline.

5 — Compensation Philosophy

Quarterly benchmarking. 75th percentile of applicable market benchmark. Offer documentation includes source, percentile, rationale. Counter-offers evaluated against underlying benchmark data, not discretionary adjustments.

Layout: Single column. 720px max-width.

Asset: Confirmed benchmarking source citation (Levels.fyi, Glassdoor, Mercer, or internal).

6 — Open Roles

Sticky filter chips: Team · Location · Engagement Type. Card grid; one card per role (title, team, location, type, 2-line description, Apply →).

Fallback when no roles open: There are no roles currently open for application. Candidates may submit a general profile for consideration as roles open within their area of expertise. CTA: Submit a General Profile →.

Layout: Card grid + sticky filters.

Asset: ATS integration (Greenhouse / Lever / Workable) OR static role list.

7 — What Dharwin Does NOT Provide

Three explicit boundaries (corporate version of anti-pitch):

Non-compensation benefits and amenities. Compensation is the structural form of remuneration. No perks beyond statutory.

Guaranteed advancement timelines. Senior practice positions earned through documented performance, not tenure.

Universal operational fit. Candidates seeking highly structured, low-ambiguity environments may find better fit elsewhere.

Layout: Three short blocks in a paper-elevated card.

Caption: This section is included intentionally. Operational misfit identified prior to engagement saves both organizational and candidate effort.

8 — Operational Environment

Magazine collage of candid team photography across US and India operations.

Layout: 5–7 images, mixed aspect ratios, real working contexts.

Asset: Candid team photography across both operating geographies.

9 — Closing CTA (override)

Review Active Roles or Submit a General Profile for Future Consideration.

Background: --ink-90.

Subhead: *Active hiring across software engineering, product design, growth marketing, sales operations, and platform development. Roles not currently listed are evaluated against general profile submissions as positions open.*

CTAs: View Open Roles ↓ · Submit a General Profile →

Contact

URL /contact · Sections 6 · Voice Corporate

Page job: Lower-friction inbound conversion. Visitors choose the path that matches their requirement — immediate consultation, written response, short query, or detailed inquiry.

Section order: Hero · Three engagement paths · Inquiry form · Operating presence · Response-time commitment · Inquiry routing FAQ.

Closing CTA exemption: Contact is the only page that opts out of the universal closing CTA — the entire page IS the conversion infrastructure.

1 — Hero

Begin a Consultation With the Dharwin Team.

Subhead: Dharwin Business Solutions responds to all inbound inquiries within one business day. Multiple engagement paths are provided below — select the path that aligns with your requirement.

Layout: Centred editorial. No CTA — the page itself is the CTA infrastructure.

2 — Three Engagement Paths

Three large cards:

Schedule a Consultation — opens calendar inline. *Schedule a 30-Minute Consultation →.*

Submit a Project Brief — opens multi-field form below. *Submit a Project Brief →.*

Direct Email — <mailto:contact@darwinbusinesssolutions.com>.

Layout: Three large cards side-by-side.

3 — Inquiry Form

Fields: Name · Business Email · Organization · Role · Service Area of Interest (dropdown — 7 services + Dharwin OS + Careers + Other) · Inquiry Detail (textarea, 3–5 sentences) · Supporting Documentation (file upload, optional, max 10 MB).

Submit: Submit Inquiry →. **Below submit:** *Standard response time: one business day. Detailed inquiries with stakeholder review: substantive response within three business days.*

Layout: Long-form contact form below the three cards. Visible by default — no toggle.

4 — Operating Presence

Headquartered in the United States. Operations Across the United States and India.

Two-column:

US Headquarters — Dharwin Business Solutions · 30 N Gould Street · Sheridan, Wyoming 82801 · phone TBD · Response within one business day.

India Operations — Distributed delivery team across multiple time zones; continuous coverage. Phone TBD · Operating hours 9:30 AM – 6:30 PM IST.

Layout: Two-column. No embedded map.

Asset: Confirmed phone numbers for US HQ and India operations.

5 — Response-Time Commitment

Dharwin Business Solutions responds to every inbound message within one business day during standard operating hours.

Body: *Detailed inquiries requiring documentation review or stakeholder input receive an interim acknowledgment within one business day and a substantive response within three business days.*

Layout: Full-width band. Light paper background. Single editorial sentence as a typographic statement.

6 — Inquiry Routing FAQ

6 questions: uncertain service category · written proposal without consultation · international clients · employment application routing · vendor/partnership inquiries (partnerships@) · NDA availability.

Layout: Accordion.

Asset Checklist

Assets required to build high-fidelity comps and ship pages to live. Rolled up from the per-page asset dependency blocks.

#	Asset	Needed for
A1	Logo SVG (existing or commissioned)	Site-wide
A2	10–12 customer logos — SVG preferred	Home trust strip
A3	Founder portrait — 4:5, 2400×3000px	About hero · Leadership
A4	Team portraits — 1:1, 1200×1200px each (up to 30)	About practice grid
A5	Operational photography (workspace, team, candid)	About operating cadence · Careers
A6	5–7 candid team photos (US + India contexts)	Careers operational environment
A7	Anonymized dashboard screenshot — Chennai logistics	Home case study
A8	Anonymized product screenshot — Mumbai FS lending	Software Dev case study
A9	Post-implementation screenshot — Pune mfg CRM	ERP & CRM case study
A10	Engagement imagery — Bengaluru SaaS	Staffing case study
A11	Engagement imagery — NY B2B SaaS	Lead Gen case study
A12	Engagement imagery — Delhi D2C	Digital Marketing case study
A13	Before/after screenshots — Austin B2B technology	Website Dev relaunch slider
A14	Primary Dharwin OS dashboard mock (Figma export)	Home product spotlight · Product page hero
A15	Three card-sized Dharwin OS UI snippets	Product page — Platform Capabilities
A16	Three scene-specific Dharwin OS UI mocks	Product page — Walkthrough
A17	Production demonstration AI agent (WebRTC)	AI Agent Development hero + live demo
A18	Fallback captioned 30-second agent video	AI Agent Development fallback if live demo not ready
A19	Platform certification badges (Zoho, Salesforce, etc.)	ERP & CRM platforms section
A20	Implementation partner logos (vector)	About recognition · ERP & CRM platforms
A21	Industry use-case iconography (3×3 grid)	AI Agent Development use cases
A22	Security & compliance tile iconography (6 tiles)	AI Agent Development security section
A23	Service-line line-art icons (24px, ember)	Software Dev categories grid
A24	Custom city marker — US headquarters	Home · Contact

Client Information Requests

Items required from Dharwin to ship the site to live. Rolled up from the per-page Client Information Requests blocks. Items marked with • are blockers — copy cannot be finalized without them. Other items can be replaced with *Pricing on Request* framing or held until the Dharwin review pass.

ORGANIZATIONAL FACTS

- **Exact incorporation year** and **registered entity name(s)** (US and India). Current page locks 2022 — confirm.
- **Founder profile(s)** — name, title, executive biography (two paragraphs each), area of operational responsibility, 4:5 portrait. Page 02 Leadership section.
- **Confirmed team headcount** and US/India geographic split. Currently locked at 48.
- **Confirmed count of active client engagements** (currently 32) and projects delivered (currently 120+).
- **Publishable list of client industries served**. Current list reflects sample assumption.
- **Confirmed phone numbers** for US headquarters and India operations.
- **Confirmed inbound email addresses** — general, partnerships, careers.

CASE STUDY CONFIRMATION

- Atlas Logistics — Chennai logistics quote-to-cash (Home featured case study). Confirm publishable name + provide anonymized screenshot.
- Mumbai financial services — lending origination platform (Software Dev case study). Confirm publishable.
- Pune manufacturing — Salesforce consolidation (ERP & CRM case study). Confirm publishable.
- Bengaluru SaaS — engineering scale through talent acquisition (Staffing case study).
- New York B2B software — outbound demand generation (Lead Gen case study).
- Delhi D2C — performance marketing CAC reduction (Digital Marketing case study).
- Austin B2B technology — marketing website relaunch (Website Dev case study). Confirm + provide before/after screenshots.

PRICING DECISIONS

- Indicative starting figures for Software Sprint engagements (MVP, Production Launch), OR confirm "Pricing on Request" framing.
- Indicative starting figures per ERP/CRM platform (Zoho, Salesforce, HubSpot).
- Indicative monthly retainer ranges per Staffing role seniority tier.
- Indicative monthly retainer ranges for Lead Generation engagement scale.
- Indicative monthly retainer ranges for Digital Marketing engagement scale.
- Indicative starting figures per Website Dev category (Marketing Website, Landing Page, eCommerce, Site Migration) and per maintenance tier.
- Indicative per-agent build figures and runtime cost ranges for AI Agent Development.
- Indicative monthly subscription per Dharwin OS Early Access tier (Foundation, Operations, Enterprise).

Client Information Requests (cont.)

PARTNERSHIPS & CERTIFICATIONS

- ERP/CRM partnership tier and certification status per platform — Zoho Authorized Partner, Salesforce Consulting Partner, HubSpot Solutions Partner, Microsoft Solutions Partner, Odoo Partner, NetSuite SuiteSuccess Partner.
- Per-platform implementation metrics — active clients, total implementations delivered, average days to live deployment.
- Operating entity for cold-email sending infrastructure (Lead Generation page).
- Telephony operating entity (US and India) for AI Agent Development.
- Employer-of-record entity names and registration details (Staffing page).

DHARWIN OS PRODUCT ASSETS

- Primary Dharwin OS dashboard mock for Page 10 hero (Figma export).
- Three card-sized UI snippets for Page 10 Platform Capabilities.
- Three product UI mocks for Page 10 Walkthrough (one per scene — customer engagement, internal continuity, executive visibility).
- Early Access Program quarterly intake capacity (currently "limited number" — confirm specific quota).
- Registration form destination and review process — operational responsibility for inbound applications.
- Final pricing-structure confirmation timeline for transition from Early Access to general availability.

CAREERS PAGE

- Compensation benchmarking source — Levels.fyi, Glassdoor, Mercer surveys, AON Hewitt, or internal practice benchmark.
- Confirmation of 75th percentile compensation positioning as stated public policy.
- ATS platform selection (Greenhouse / Lever / Workable / equivalent) + integration credentials.
- Current list of open roles — title, team, location, type, two-line description, application link.
- General profile submission destination — recruitment inbox / ATS general talent pool.
- Explicit confirmation that the *What Dharwin Does Not Provide* anti-pitch section is acceptable for the brand.
- Candid team photography across US and India (5–7 images).

BACKEND INTEGRATIONS

- Calendar tooling for inline consultation booking (Calendly, Cal.com, HubSpot Meetings, or equivalent).
- Form submission backend — inquiry form, project brief, role specification, audit request, early access registration.
- Mailto handlers for direct email and partnerships email paths.
- ATS integration for Careers Open Roles.

Operating Notes for the Designer

ACCESSIBILITY — required, not optional

- All text colors must meet WCAG AA contrast ratios. Verify ember on paper, ember on ink-90, muted on paper in Figma with a contrast plugin before shipping.
- Every CTA has a visible focus ring (2px ember, 2px offset).
- All images need real alt text — write during copy review.
- Site must be fully keyboard-navigable. Dropdowns open on focus, accordions toggle on Enter / Space.
- Motion respects *prefers-reduced-motion*. Disable reveals and marquees for users who request it.

PERFORMANCE — non-negotiable

- Largest Contentful Paint target: under 1.8s on 4G.
- Total page weight: under 1MB on Home, under 800KB on service pages.
- Use Next/Image (or platform equivalent) for all images. WebP/AVIF.
- Web fonts: subset Fraunces and Inter. Preload the two display weights only.
- No third-party scripts above the fold. Analytics and chat in a deferred bundle.

RESPONSIVE

- Three breakpoints: desktop (1280+), tablet (768–1279), mobile (under 768).
- Test on iPhone 13, Pixel 7, iPad Mini portrait.
- Mobile is primary surface for AI Agent Development live demo button (tap-to-talk > click-to-talk on phones).
- Mobile tweaks: header collapses to logo + hamburger + CTA; split heroes stack (copy first, visual second) except Staffing form-led hero where form stays at top; stat blocks become 2×2 grids; sticky-scroll narratives degrade to vertical sequence.

COMPONENT BUILD ORDER

If building the system before page layouts: (1) Foundations — colour, type, spacing, grid · (2) Header + Footer · (3) CTA Primary / Secondary / Banner · (4) Hero variants (Editorial / Split / Centred) · (5) Card variants (Service / Case study / Person) · (6) Stat block · (7) Process steps · (8) Pull quote · (9) Form components · (10) Accordion / FAQ · (11) Logo strip · (12) Pricing card. With these built, the 12 pages are composition work, not invention.

SIGN-OFF PATH

Each page goes designer → Odin internal review → Dharwin review. Lock the design system (colour, type, components) before laying out page 3+ — changes to system tokens propagate; changes to bespoke layouts do not.
